[Power Typing](#) hosts a small collection of five typing games that students can use to develop their typing skills. [Power Typing](#) also offers typing lessons for Qwerty and Dvorak keyboards. The two games that I found easiest to access are [Alphabetic Rain](#) and [See Don't](#).

[Good Typing](#) is a free online typing skill development program. [Good Typing](#) provides 27 graduated lessons designed to help students learn to use their entire keyboards correctly. Unlike some free online typing programs, [Good Typing](#) offers support twenty different keyboard styles including US style, Japanese style, and several European languages.
